

Fine Grain Art Paper

Description	Print	Applications
The photo paper is made of a pure wood pulp paper base and refined by embossing. The paper has the characteristics of high whiteness and brightness, and has good light resistance. The surface is processed, the color after printing is uniform and dense, the paper base is solid and of high stiffness, and the broken line is not easy to be damaged. It has excellent printing and processing adaptability. Its unique style, classic and exquisite lines, noble and elegant, with a cotton-like sense of elegance, is close to the traditional silk photo	<ul style="list-style-type: none"> > HP Indigo > Konica Minolta AccurioPress C83hc 	> Wedding album, photography, business album, pictorial album, books, catalogs, calendars, greeting cards, business cards, hangtags, etc.
